

FOOTFALL GLOBAL LLC

FINAL WEBSITE DEVELOPER SCRIPT & CREATIVE DIRECTION

TURNING SPACES INTO DESTINATIONS.

Brand positioning, page architecture, approved messaging, content hierarchy, case-study direction and development notes.

Visual identity: Deep luxury green + metallic gold. Premium, contemporary, experiential and technology-led.

1. PURPOSE OF THIS DOCUMENT

This document is the final content and creative-direction brief for the FOOTFALL GLOBAL LLC website. It should be used by the web developer, UI/UX designer, content team and motion designer as the primary reference for completing the site.

The website must sell **the FOOTFALL idea before it sells equipment**. FOOTFALL is an experiential engagement and audience-attraction company. Its products, technology and event infrastructure are the tools used to create the experience.

2. BRAND FOUNDATION

Company: FOOTFALL GLOBAL LLC

Proprietor: Amal El Houm

Locked master slogan: TURNING SPACES INTO DESTINATIONS.

Core business: Experiential engagement, event activations, audience attraction, event technology and measurable visitor interaction.

The master slogan must be used exactly as written. Do not replace it with another primary slogan unless specifically approved.

3. THE FOOTFALL POSITIONING

FOOTFALL GLOBAL exists to create a reason for people to approach a particular place, brand, stand, venue or event zone. The company develops experiences that attract attention, encourage participation and create a memorable connection between the audience and the brand.

The positioning is not: *an event-equipment rental company that also creates activations*.

The positioning is: **an experiential engagement company that controls the concepts, technology, equipment and infrastructure required to deliver those experiences**.

The central philosophy is: **Experience instead of direct selling**.

4. BRAND EXPERIENCE MODEL

Use the following engagement journey throughout the site:

ATTRACT -> ENGAGE -> EXPERIENCE -> CAPTURE -> CONNECT

ATTRACT: Create something visually difficult to ignore.

ENGAGE: Give people a reason to approach and participate.

EXPERIENCE: Make the interaction memorable and relevant to the brand.

CAPTURE: Where appropriate, use registration, QR, touchscreen or event technology to measure engagement.

CONNECT: Extend the relationship beyond the physical activation.

5. VISUAL IDENTITY - LOCKED DIRECTION

The website must follow the FOOTFALL visual identity already established by the logo and approved concept.

Primary background: Deep luxury green.

Primary accent: Metallic / warm gold.

Supporting tones: Off-white, muted cream, charcoal and controlled black.

Logo treatment: Gold logo on deep green wherever practical.

The visual language should feel premium, cinematic, modern and controlled. Avoid bright generic corporate colors, excessive gradients, cheap neon effects, cluttered iconography and template-style event-rental design.

Actual activation photography and video should provide movement and additional color while the website framework remains predominantly green and gold.

6. HOMEPAGE - HERO SECTION

The first screen must communicate the company in seconds.

Primary headline:

TURNING SPACES INTO DESTINATIONS.

Supporting copy:

We create experiences that attract people, inspire participation and turn ordinary spaces into places people want to be.

Primary CTA: EXPLORE EXPERIENCES

Secondary CTA: CREATE AN ACTIVATION

The hero should use a strong full-width image or short cinematic loop showing a FOOTFALL activation with genuine audience participation. The activation should be the visual hero; do not lead with furniture or isolated equipment.

7. HOMEPAGE - IMMEDIATE SERVICE STRIP

Directly below the hero, show six clean categories using refined gold line icons:

EXPERIENTIAL ACTIVATIONS

DIGITAL EXPERIENCES

EVENT TECHNOLOGY

CROWD MANAGEMENT

EVENT ENVIRONMENTS

CONSULTATION & CONCEPT DEVELOPMENT

This gives visitors an immediate understanding of the company's capabilities without turning the homepage into a product catalogue.

8. PROOF SECTION - ADIHEX 2026

Headline: **REAL PEOPLE. REAL RESULTS.**

Primary statistic: **4,700+ REGISTERED VISITORS**

FOOTFALL GLOBAL's first major Abu Dhabi activation at ADIHEX 2026 demonstrated the model in practice. An approximately 4m x 4m Giant Claw activation created a visible attraction, generated queues and encouraged visitors to participate while supporting the wider objective of increasing awareness around dogs and cats requiring adoption, care and responsible rehoming.

Use actual photography and video from the event. Supporting proof points may include: **visitor queues, social sharing, brand engagement and measurable registration.**

CTA: **VIEW CASE STUDY**

9. CASE STUDY STRUCTURE

Every major activation should become a structured FOOTFALL case study. Use the same format each time:

Event - where and when the activation happened.

Client / Partner - who the experience supported.

Challenge - what the client needed to achieve.

FOOTFALL Concept - the creative solution.

Activation - what was physically or digitally deployed.

Visitor Experience - how people interacted with it.

Measured Results - registrations, interactions or other verified metrics.

Gallery / Video - visual evidence.

Outcome - what the activation achieved for the brand.

10. EXPERIENCE / PROCESS SECTION

Headline: **WE ENGINEER ATTENTION.**

Display the five-stage FOOTFALL process horizontally on desktop and vertically on mobile:

01 ATTRACT - Create something impossible to ignore.

02 ENGAGE - Give people a reason to participate.

03 EXPERIENCE - Make the interaction memorable.

04 CAPTURE - Turn participation into measurable engagement.

05 CONNECT - Build a relationship beyond the event.

11. EXPERIENCES - PRODUCT ARCHITECTURE

Products should live inside experience categories, not as an unstructured rental list.

Experiential Activations: Giant Claw Machine, gift activations, custom interactive concepts, custom mascots and custom plush toys.

Digital Experiences: Walking LED billboard bags, indoor LED walls, 43-inch touchscreen displays, custom LED content and digital brand experiences.

Event Technology: PTZ cameras, standard controllers, video controllers, tablets, custom crowd-control software, QR registration and visitor-registration systems.

Crowd & Visitor Management: Queueing systems, barricades, wristbands, visitor-flow systems and registration management.

Event Environments: Exhibition lighting with dimmers, cocktail tables, high leather chairs, single-seater chairs, Elite Tables and supporting event infrastructure.

Consultation & Concept Development: Activation strategy, creative consultation, visitor-engagement planning, concept development, brand-experience strategy and custom event solutions.

12. FEATURED EXPERIENCE - GIANT CLAW

Headline: **THE GIANT CLAW**

Subheading: **A familiar game transformed into an event landmark.**

At approximately 4m x 4m, the FOOTFALL Giant Claw is designed to become a visual destination inside an exhibition,

festival, mall or public event. Its scale creates curiosity. Participation creates entertainment. Queues create further curiosity. The audience itself begins attracting another audience.

Possible customisation includes branding, LED displays, custom content, lighting, plush toys, campaign prizes, QR registration, visitor data capture and queue management.

Campaign line: **DON'T WAIT FOR THE CROWD. CREATE IT.**

13. FEATURED EXPERIENCE - GIFT TREE

Headline: **DISCOVERY CREATES ENGAGEMENT.**

The Gift Tree turns a branded display into a physical discovery experience. Branded cards or objects become part of the interaction, with surprises revealed through participation.

The principle is simple: **when the audience interacts with the branding, the branding becomes part of the memory.**

14. WALKING LED MEDIA

Headline: **TAKE THE MESSAGE TO THE CROWD.**

Walking LED billboard bags allow digital content to move through exhibitions, malls and event environments instead of waiting for the audience to pass a static display. This product should be presented as mobile audience attraction and directional media rather than simply a screen mounted on a backpack.

15. TECHNOLOGY & DATA

Headline: **FOOTFALL YOU CAN MEASURE.**

A successful activation should produce more than photographs. FOOTFALL can integrate registration and visitor-management technology into the experience where appropriate.

Suggested visual journey: **VISITOR -> QR / TABLET / TOUCHSCREEN -> REGISTRATION -> PARTICIPATION -> AUDIENCE DATA -> POST-EVENT CONNECTION.**

Only publish data-capture, analytics or tracking capabilities that the deployed system actually supports.

16. ABOUT AMAL EL HOUM

Headline: **THE VISION BEHIND FOOTFALL**

Amal El Houm
Proprietor, FOOTFALL GLOBAL LLC

FOOTFALL GLOBAL is built around a simple belief: people remember experiences longer than they remember advertisements.

Amal El Houm's vision is to create a different approach to audience engagement - one where brands move beyond direct selling and instead create experiences people genuinely want to approach, participate in and share.

Through creativity, technology and physical activations, FOOTFALL GLOBAL aims to transform ordinary event spaces into destinations and passing audiences into engaged communities.

The objective is not simply to put a brand in front of people. **It is to give people a reason to come to the brand.**

17. NEWS SECTION - FOOTFALL STORIES

Use **FOOTFALL STORIES** as the editorial/news identity.

Initial article ideas:

4,700+ VISITORS: FOOTFALL GLOBAL MAKES ITS ABU DHABI DEBUT AT ADIHEX 2026

THE GIANT CLAW: HOW SCALE TURNED AN ACTIVATION INTO AN ATTRACTION

THE GIFT TREE: TURNING BRAND PLACEMENT INTO DISCOVERY

Future activations should continuously feed this section so the website builds a visible record of proven work.

18. CONTACT / CONVERSION SECTION

Headline: **WHERE DO YOU NEED THE CROWD?**

Supporting copy: Tell us about your brand, event, venue or destination. FOOTFALL GLOBAL will develop an experience designed to bring people to it.

Recommended form fields: Name, Company, Email, Telephone, Event / Venue, Event Date, Location, Expected Attendance, What Are You Trying to Achieve?, Message.

CTA: **CREATE MY ACTIVATION**

19. MAIN NAVIGATION

Recommended desktop navigation:

HOME | ABOUT | EXPERIENCES | TECHNOLOGY | CASE STUDIES | NEWS | CONTACT

Persistent highlighted CTA: **CREATE AN ACTIVATION**

Mobile navigation should remain minimal and retain the Create an Activation CTA.

20. UX / DEVELOPMENT DIRECTION

The site must be responsive across desktop, tablet and mobile. Prioritise fast loading, compressed media, clean transitions and clear CTA placement.

Use subtle motion rather than excessive animation. Recommended effects include controlled image reveals, statistic counters, short hover transitions, scroll-triggered process steps and restrained gold-line movement.

Video should be muted by default and optimised for web delivery. Provide static poster images as fallbacks. Text must remain readable over all media using controlled overlays where necessary.

The website should feel premium and cinematic without sacrificing speed or usability.

21. CONTENT RULES

1. Do not describe FOOTFALL primarily as a rental company.
2. Lead with experience, attraction, participation and measurable engagement.
3. Use verified numbers only.

4. Use actual event imagery whenever available.
5. Keep copy concise on visual pages; deeper information belongs inside case studies and service pages.
6. Maintain the deep-green and gold identity consistently.
7. Keep the master slogan exactly as: **TURNING SPACES INTO DESTINATIONS.**
8. Present equipment as part of an integrated solution, not as the brand's core identity.

22. FINAL POSITIONING FOR THE DEVELOPMENT TEAM

The website should leave a visitor with one clear understanding:

FOOTFALL GLOBAL creates experiences that make people want to come to a place.

The company can then support those ideas with the physical activation, technology, media, crowd systems and event infrastructure required to execute them.

The idea is the product. The equipment enables the idea. The audience experience proves the value.

FOOTFALL GLOBAL LLC

TURNING SPACES INTO DESTINATIONS.
